Revit

personal statement

An engaged, motivated and optimistic Part 2, recently graduated from Edinburgh University, passionate about architecture as a material, social and academic endeavour. I have 2 years' experience as a Part 1 Architectural Assistant as part of a small team in Edinburgh working on a wide range of projects, from major arts centres to small dwellings. My work is highly process driven, with a keen interest in the intersection of manual and digital craft.

I am ideally looking for part-time work 3-4 days a week.
