

SI YU KUANG

STAR TREK

Interiors can not only provide a home for your body, but also support your soul. I have been exploring the meaning of interiors. From the beginning, I thought that a good interior space can provide people with a sense of physical comfort. Now I pay more attention to another aspect of interior functions, that is, a good interior can support people's soul and can even activate the soul of man. This is a design for a nightclub, I gave it an interstellar theme. We are like tiny dust in the vast universe. I think we need passion and romance. The sparks of social collision can ignite the vast interstellar space. I hope that every encounter of people in this space nourishes the lonely souls on every planet.
